

Minor in Business Administration

The Business Administration minor, available to all non-business undergraduates, prepares students to be ethical and successful leaders in their chosen career fields through an enhanced understanding of business.

The curriculum is designed to enhance any major by developing strategic thinking skills, building core business knowledge and cultivating leadership skills.

Non-business majors: Prerequisites for all business courses in the BA minor are amended for non-business majors. The only prerequisite for all business courses with the exception of AC 2302 is the successful completion of any 1000-level Math class. *AC 2302 requires completion of AC 2301.
